#### OUR COMPANY ROLE

We deal with all the sausages and salami labelled in Calabrian DOPs. However, among the sausages, stand out the Calabrian "soppressata".

In Calabria, and generally in the south of Italy, salami is part of southern Italian cultural heritage, much more than in the north. All these salami from Calabria dates to the period of Greek colonization of the Ionian coast and the cultural glories of Ancient Greece. Historical records describe processing of pork from the seventeenth century. All of our associated supplier manufacturing facilities adhere to strict Good Manufacturing Practices (GMPs) to safeguard quality and supply of our products. Their sites are approved by their respective Safety, quality and national health authorities, sometimes they also got the high regarded compliance with US Food and Drug Administration (FDA).
